negligence which can be confrontational in favour of a human obligations approach which is collaborative and thus well suited to the doctor patient relationship drawing on the theoretical analysis the book identifies doctrinal anomalies in the duty of care standard of care causation and damage it critically analyses landmark uk supreme court cases including chester v afshar montgomery v lanarkshire health board and mcculloch v forth valley health board arguing that the law is increasingly detached from the realities of medical practice and reasonable expectations of patients primarily based on uk law the work also discusses australian canadian and singaporean law the book is aimed at the medical and legal fraternities as well as students and scholars of tort law doctors and lawyers will gain fresh insights into medical negligence scholars will find an alternative perspective to orthodoxy with rich material to rethink theory and doctrine in negligence
