humanity's creative capacity has never been more unsettling than it is at our current moment when it has ushered us into new technological worlds that challenge the very definition of the human those anxious to safeguard the human against techno scientific threats often appeal to religious traditions to protect the place and dignity of the human but how well do we understand both theological tradition and today's technological culture in the indiscrete image thomas a carlson challenges our common ideas about both arguing instead that it may be humanity's final lack of definition that first enables and calls for human creativity and its correlates including technology tradition and their inextricable interplay within religious existence framed in response to martin heidegger's influential account of the relation between technological modernity and theological tradition the indiscrete image builds an understanding of creativity as conditioned by insurmountable unknowing and incalculable possibility through alternative readings of christian theological tradition and technological culture and the surprising resonance between these two carlson concludes that the always ongoing work of world creation tied essentially to human self creation implies neither an idol's closure nor an icon's transcendence but the indiscrete image whose love makes possible by keeping open both the human and its world

collections *Ficciones* and *El Aleph* exploring the rich tapestry of symmetries, doubles and allusions and the roles played by translation and the figure of the creator the book provides new readings of these stories revealing their hidden personal, emotional and spiritual dimensions these insights shed fresh light on Borges's supreme literary craftsmanship and the intimate puzzles of his fictions

Over the course of the last 15 years Constantine Sandis has advanced our understanding of the role that action plays in shaping our moral thought in this collection of his best essays in the philosophy of action Sandis brings together updated versions of his writings accompanied by a new introduction read collectively they demonstrate the breadth of his interests and ability to relate to broader issues within the culture connecting debates in philosophical psychology about motivation, negligence and moral responsibility with Greek tragedy, social psychology and literature along this path from action to ethics Sandis engages with Hegel, Wittgenstein, Anscombe, Ricoeur, Davidson and Dretske together with contemporary authors such as Jennifer Hornsby and Jonathan Dancy as he responds to each thinker and theme he develops his own philosophical position the key thesis of which is that philosophy of action without ethics is empty ethics without philosophy of action is blind

There was a time when universe meant all there is everything yet as Brian Greene's extraordinary book shows ours may be just one universe among many like endless reflections in a mirror he takes us on a captivating exploration of parallel worlds from a multiverse where an infinite number of your doppelgängers are reading this sentence to vast oceans of bubble universes and even multiverses made of mathematics showing just how much of reality's true nature may be hidden within them
