how pervasive digital devices smartphones ipods gps navigation systems and their networks us formulate a sense of place and refine social relationships how do pervasive digital devices smartphones ipods gps navigation systems and cameras among others influence the way we use spaces in the tuning of place richard coyne argues that these ubiquitous devices and the networks that support them become the means of making incremental adjustments within spaces of tuning place pervasive media help us formulate a sense of place writes coyne through their capacity to introduce small changes in the same way that tuning a musical instrument invokes the subtle process of recalibration places are inhabited spaces populated by people their concerns memories stories conversations encounters and artifacts the tuning of place whereby people use their devices in their interactions with one another is also a tuning of social relations the range of ubiquity is vast from the familiar phones and hand held devices through rfid tags smart badges dynamic signage microprocessors in cars and kitchen appliances wearable computing and prosthetics to devices still in development rather than catalog achievements and predictions coyne offers a theoretical framework for discussing pervasive media that can inform developers designers and users as they contemplate interventions into the environment processes of tuning can lead to consideration of themes highly relevant to pervasive computing intervention calibration wedges habits rhythm tags taps tactics thresholds aggregation noise and interference

a practical and systematic approach to tuning in this third edition the authors aim has been to simplify and demystify the procedure of tuning control systems based on their successful tuning work in oil refineries a new chapter has been added on the use of auto tuning software currently available in most current computer control systems the authors have used this software whenever possible to carry out the dynamic testing of the process as it is less disruptive of operations than doing the tests manually they have also used the tuning results to guide them but always using the principles presented in the book to evaluate them all of the example responses have been generated using simulation software to illustrate the tuning and show the differences between tuning controllable versus dead time dominated loops averaging versus tight level control cascade control versus simple feedback control of a jacketed chemical reactor feedforward control versus simple feedback control decoupler control versus simple feedback control of a blender
